AT A GLANCE

Welcome to Web Soft BD

ICT Specialized @ Meteorology, Agriculture, Agro-Meteorology Climate, Weather , Water, Food, Environment

Web Soft BD is a privately held ICT Company in Dhaka, Bangladesh. In the year of 2008; Web Soft BD was started journey. It has been achieved Certification of ISO 9001:2015 & BASIS (Bangladesh Association of Software & Information Services). Web Soft BD was established by a group of professionals with a desire to provide the best ICT (Information Communication Technology) Solutions in Bangladesh and Abroad. The company WEB SOFT BD, an ICT company. At present is actively involved in operationalization of the World Bank & JICA funded project in Bangladesh: "Agro-Meteorological Information Systems Development Project" "Bangladesh Meteorological Department (BMD)" Bangladesh Water Development Board (BWDB)" Developed already 1000 + projects in World Wide.

The company WEB SOFT BD, also is actively involved in operationalization of the World Bank funded project entitled "Agro-Meteorological Information Systems Development Project, Component-C of Bangladesh Weather and Climate Services Regional Project in Department of Agricultural Extension (DAE), Ministry of Agriculture(MoA), Bangladesh. Under this project, WEB SOFT BD has developed a dynamic and interactive portal named "Bangladesh Agro-Meteorological Information (BAMIS) portal (https://www.bamis.gov.bd/).

In Bangladesh, all the components of climate services are being displayed and communicated to the all engaged in services to the agriculture including the farmers. Ministry of Agriculture actively supports and campaign for the portal for benefit in agriculture in Bangladesh. The portal is very popular in Bangladesh. Besides, World Bank and other national and international organization appreciated the services rendered to the farmers in Bangladesh through this portal. Web Soft BD also developed & involved in operationalization of the "Bangladesh Meteorological Department (BMD), Ministry of Defence, Bangladesh, www.bmd.gov.bd .

Under this project, WEB SOFT BD has developed a dynamic and interactive Portal, Apps, Software, Weather Automated Dissemination System, Meteorological Data Assessment Sub System, Earth Quack Apps and other ICT services. Named: www.bmd.gov.bd

And, also Actively involved in operationalization of the "Bangladesh Water Development Board (BWDB), Ministry of Water Resources, Bangladesh. Under this project, WEB SOFT BD has developed Development of hydrological services products such as sediment prediction & river bank erosion, hydrological drought prediction, salinity intrusion forecast, ground water outlook and forecast, surface water supply outlook etc. and upgrade of existing website to display real time data, products & warnings. (hfms.bwdb.gov.bd)

Web Soft BD has to construct SMRC's (SAARC Meteorological Research Centre) website. Initially, farmers were offered free hydro-meteorological products (flood, drought, and cyclone) through a local NGO. Because these products were insufficiently accurate at the time, individuals in the market attempted to develop them as weather predicting products that could also be utilized in agriculture. We surveyed the field level work on hydro-meteorology during this project. In addition, our team and we maintain and manage the BMD website. Various types of meteorological and agrometeorological data are collected at the field level and distributed to various organizations via a web site (API) that has an agreement to accept meteorological data like DAE.

At present WEB SOFT BD expresses its interest to develop, upgrade, maintenance & supports similar services to other countries in the World where such facilities are not available. At present, WEB SOFT BD has well experienced personnel having domain knowledge in agriculture, meteorology, computer science, ICT etc. WEB SOFT BD will be extremely happy and ready to accept any such project elsewhere and also fully justify its commitment to the project.
